PHILIP MORRIS U.S.A.

INTEROFFICE CORRESPONDENCE

Richmond, Virginia

To: Dr. C. R. Adams **Date:** January 25, 2002

From: Jennifer Amador JA

Subject: A literature review on smoking compensation/titration

An identical search was undertaken in May 1999 on the topic of smoking and compensation. I have included a copy of that memo for your review. I have added several other publications to the list of books available in the PMUSA Library.

To update the references found in 1999, a Medline search was done. The search was limited to articles published on humans between 1996 and 2002. The following terms were used:

(smoking[mh] or nicotine[mh]) and (compensation or titration) not economics

A total of 3 additional articles were found. One of the articles is by Scherer and appears to be a version of his original article which appeared in the 1997 Recent Advances in Tobacco Science. Copies of all three articles are enclosed.

If you need additional information, please call me at 4-4854.
